

## SKILLS

JavaScript , React.js , Redux , HTML5 , CSS3 , PUG , Jinja , SQLAlchemy , Sequelize , PostgreSQL , Python , Node.js , Express.js , Flask , Heroku , Git , APIs , Docker

## PROJECTS

**gotahome** | ( *React / Redux , Flask / Python , PostgreSQL , JavaScript and HTML5 / CSS3* )

[live](#) | [github](#)

*Full stack clone of Zillow*

- Facilitated primary use case of the app by listing your home for sale / rent including home details associated with photo url
- Integrated Google Maps API to dynamically present home locations based on user parameters.
- Created custom modal framework using React component architecture allowing for efficient development of new forms

**sidewalk-surfers** | ( *React / Redux , Flask / Python , PostgreSQL , JavaScript and HTML5 / CSS3* )

[live](#) | [github](#)

*Full stack clone of Instagram*

- Integrated Google Maps API to display the skateboarding spot's location on the home page
- Implemented 3 different CRUDs for spots, posts, and comments using React
- Created a component for an Instagram-like post easily replicated by passing the post info

**jovero** | ( *React / Redux , Flask / Python , PostgreSQL , JavaScript and CSS* )

[live](#) | [github](#)

*Full stack clone of yelp*

- Configured the Node backend with PostgreSQL, using the Sequelize ORM for validations and database queries.
- Integrated React Player with Redux's global store by dispatching actions only when sharing information across components and encapsulating business data to give the user a seamless experience.
- Utilized Redux architecture's unidirectional data flow with React for predictable state and reliable DOM rendering

**parenting-matters** | ( *PostgreSQL, PUG, JavaScript, Express, CSS* )

[live](#) | [github](#)

*Full stack clone of stackoverflow*

- Leveraged Bcrypt for user authentication and password security.
- Utilized Express backend queries to display parents questions ordered by most updated.
- Implemented a joins table for creating questions and answers connecting to a user.
